

# PORTABLE HANDLIGHTS: RECHARGEABLE

PRODUCT  
CODE

C

- (A) **MODEL: A35-H7550-120VAC** - As shown with H7550 halogen spotlamp. Recharges from wall outlet.  
**MODEL: A35-H7550-120VAC-12VDC** - Same as above but also charges from 12VDC vehicle battery.

Our most popular types of handlights which have found recognition in security, maintenance, marine, and construction industries. The most valuable feature of the A35 types is that we make a heavy duty polycarbonate swivel which allows the light to be aimed in any direction. Also the charger is built in and all one has to do is plug the unit into any wall outlet. Also due to the heavy construction of the case and handle it can take the most abusive conditions. This light can also be equipped with a dual charger which allows it to be charged from a wall outlet or car battery.

- (B) **MODEL: A38-ANC-H7550** - Dry battery unit uses 6 volt spring lantern battery. Available in spot or flood halogen bulbs and has adjustable clevis mounted head.

- (C) **MODEL: A38-ANCR-H7550** - Same as above but made with rechargeable battery. It can be recharged from its own rack which connects directly to 12VDC (battery) or with use of transformer from 12VAC. This light can use rechargeable or dry cell batteries.

**MODEL: A38-ANCR-H7550** - Light only.

**MODEL: A38-ANCR-RACK** - Rack only for charging light from auto or boat battery.

**MODEL: A38-ANCR-TRANS** - Transformer for using rack on 120VAC wall outlet.

**MODEL: A38-ANCR-KIT-WALL** - This includes a light, wall rack and transformer for charging off 120VAC

**MODEL: A38-ANCR-KIT-VEHICLE** -

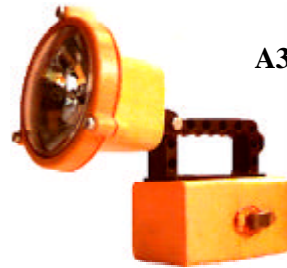

Complete light and vehicle mount charger rack. This rack can be connected directly to a vehicle battery or when used with a transformer it can be connected to a wall outlet - 120 volts, 60hz, AC.
