

# BUOY LIGHTS: GUIDES TO NAVIGATION

Rugged hermetically sealed buoy lights for both channel marking and obstructions. Standard lights use 6 - NEDA 920 batteries. Supplied. These units are made with single lamp and with automatic spare lamps. They turn off in the daytime automatically and come in standard flash rates of 15, 30, and 60 flashes per minute. Every unit is supplied with tamper proof locking bolts. Low intensity has range of 1 - 2 miles and high intensity 2 - 5 miles.

**(A) MODEL: SERIES BUNY**

As shown, this unit is a six battery standard type.

**(B) SERIES: BUNY-OIL**

As shown, in a single battery unit with a built in mercury switch. Self floating - needs no buoy and has a stainless steel eye bolt on the bottom for tying to nets. Automatic day switch. Has a standard flash rate of 30 FPM and uses one 6 volt NEDA 920 battery.

**(C) SERIES: BUNYBZ-1850-(COLOR)-(RATE)**

This is a self contained marker light. Available in flashing or steady modes. Will operate for 3 months on one alkaline 6 volt spring battery NEDA 908A.

**NOTE:** When ordering Buoy Lights: Rate, Color and Intensity (low - high) **must** be specified.

**SUFFIXES:** 1949 - Lamp  
1317 - Lamp  
1850 - Lamp
