

VEHICLE WARNING LIGHTS

A complete line of Par 46 sealed beam warning lights using 5 1/2" diameter sealed beam lamps. Available with red, blue, green, amber, and clear color filters. Also produced in chrome, black, yellow, and amber polycarbonate housings. Standard units use G.E. Lamp 4531, but are also available in a variety of other lamps.

(A) **SERIES: 112-CL**
CLEVIS MOUNT - As shown. This allows light to be adjusted to road if truck mounting is not horizontal to the road.

(B) **SERIES: 112-S**
STUD MOUNT - This series has a molded 3/8" x 1" diameter stud molded in base of the light.

(C) **SERIES: 112-A**
ANGLE BRACKET - As shown. Allows light to be mounted under or over edges. Allows light to be mounted on thin sheet metal surfaces.

(D) **SERIES: 112-R**
RECESSED MOUNT - Used in applications where light is recessed into back flat surfaces on emergency trucks.

(E) **SERIES: 112-O**
OFFSET MOUNT - This light is same as 112-S except supplied with an offset casting to bring light away from the mounting hole. Good for mounting on bumpers.

NOTE: Model numbers with no lamp numbers are supplied with an automotive driving lamp #4531-35 Watts. Others are supplied upon request.
